

The integration between cloud-based INEX TECHNOLOGIES' ALPR-Based Visitor Management & Access Control System and Campground Commander Reservation enables the system to use vehicle license plates as reservation identification to operate gates automatically and to automatically check-out guests who left the grounds at the set time. Unlimited Number of Access Lists (Vendors, Employees, Visitors' Guests, etc.)

The Campground Commander cloud-based reservation solution, integrated with INEX's **IZCamp** On-the-Cloud License Plate-based Vehicle Access Control System, would enable campground operators to automate access to the facility by using license plates as the visitor's identification as well as to manage visitors' guests and receive alarms on watch list vehicles.

The solution would enable visitors to schedule and pay for campground access online, and enter and exit campground facilities during their reserved time without any interaction with campground personnel. To do so, at the time of booking, visitors enter their vehicle's (and trailer's) license plate number into the **Campground Commander** reservation system. Then the system passes reservation information to INEX's Cloud-based **IZCamp** Access System, which communicates with ALPR cameras installed at the camp's entrances and exits. As the vehicle approaches an entry gate, the license plate is instantly recognized by the **IZCamp** ALPR camera. If the reservation for this license plate is valid, the ALPR camera sends a signal to open the gate. If the plate is not on the list of vehicles with active reservations the gate will not open and the system will send notification message to the management. Moreover, if ALPR cameras are also installed at the exits, the system can automatically check out visitors at the end of their stay

when they leave the premises and notify facility operators of the vehicles that have overstayed their allotted time. The **IZCamp** also allows operators to grant access rights to the Visitor's guests during specified time-frame and to receive alerts on guests that did not leave on time. In addition, the system allows users to create unlimited number of access lists (vendors, employees, etc.) and to assign time/date entrance rules.

The Campground Commander integration with the **IZCamp** ALPR system creates an efficient, accurate, and reliable solution, enabling management to reduce employee-visitor interaction and operate campground entrances/exits without the need for round-the-clock staffing.

Cloud-Based & Stand-Alone:

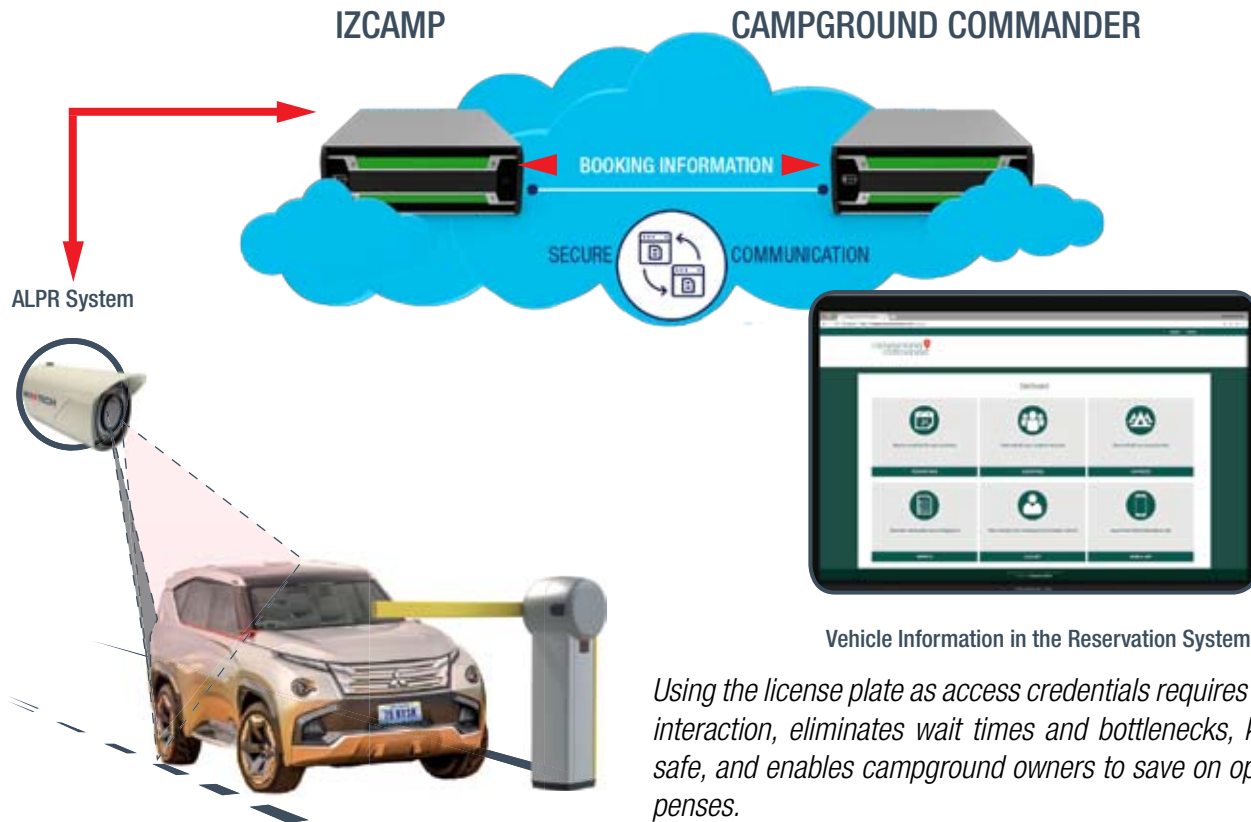

Access rights database replicates between the cloud and edge devices so ALPR system will continue to function even if connection to the cloud is lost.

Features:

- ✓ Gated and gateless operation
- ✓ Easy to use web interface
- ✓ Security reporting and watch lists
- ✓ Automatic check-out
- ✓ Reports on overstayed vehicles
- ✓ Visitors' guests vehicle identification

CAMPGROUND COMMANDER RESERVATIONS & INEX TECHNOLOGIES IZCAMP ALPR

IZCAMP ALPR SYSTEM COMPONENTS & SOFTWARE

IZ600FJ CAMERA SYSTEM

- ❑ IZ600FJ Bullet ALPR Camera: Autoswitch (OV and LPR), with a small DPU unit, and ALPR software
- ❑ DPU: Real Time ALPR Engine with less than ¼ of a second plate processing time
- ❑ Multiple IR Flash Technology: Enables the camera to capture multiple plate images, ensuring the highest quality photo, in all lighting and weather conditions
- ❑ Multiple Camera Systems can be deployed

IZCAMP FOR CAMPGROUND COMMANDER

- ❑ Designed with Campground Operators in mind
- ❑ Enables NEWBOOK to open gates with License Plates
- ❑ Easily Set-up with Existing Campground Commander Reservation System

ABOUT INEX TECHNOLOGIES

INEX TECHNOLOGIES has been supplying proven ALPR (Automatic License Plate Recognition) / ANPR (Automatic Number Plate Recognition) technology since 1993. We are the resource that organizations around the world turn to for license plate reader cameras and tailored solutions. Using advanced IR (infrared) LED technology, our solutions effectively capture license plate data from passing vehicles in real time at any time, day or night.

For further information about the INEX TECHNOLOGIES' IZCamp Cloud solution, and all of our other system components and solutions, please contact info@inextechnologies.com.
